

OCTOBER

Hello 3rd Grade Character Education Volunteers!

Thank you for taking the time to help our PSE students learn about the importance of their character.

Please remember that the main goal is for the kids to think through and learn about the monthly trait; so, if you don't get through the entire slide presentation or activity that is completely fine. If the kids walk away understanding the character trait, then you have succeeded!

I'm learning right along with you and welcome any feedback on what went well or how we can improve for next month.

Thanks!

Activity

Birthday Line Up

The goal here is to develop team building and communication skills.

Have the group line up against a wall or stand on a line, all facing forward.

Instruct the group that they need to get into a line in order according to their birthday by month and date, without losing contact with the wall or going off the line.

The leader (facilitator) then checks the order that the group is in to see that it has the correct order. It is important to emphasize that success is reached when all members of the group work collaboratively together as a team.
